Daniel & Taylor - Toucan ⭐ ❤️

To: "Taylor, CEO of Toucan" <taylor.nieman@jointoucan.com>

Dear Taylor,

Did you get a chance to give it a try and see how the win32 software that I sent with (source code included) looks and feels like?

If so, can you please make me any recommendations on how to improve the UI/UX and graphics to make it feel more pleasant and enjoyable, relaxing us more and making our brains absorb the information in a better manner and with better results?

I just wish you had the chance to use the win32 software I sent for a minute or two.
To run you just double-click the batch file. It is just a batch file to instantiate it several times.
I know it may look ultra scary to run but as you can see in a text editor is nothing too fancy, just instantiating the win32 app several times at once...

Any questions, dear Taylor?

Kind regards,
Daniel Alexandre

Hi Taylor,

No problem, actually these tools to help us improve languages proficiency is something that has been interesting to me for a very long time.
Once I was planning to do a Kickstarter project for a software like that.
I even did a video to show how it would look like:
https://www.youtube.com/watch?v=xrAgTsHNo74
(it is just 3-4 minutes of your spare time).

Later on, I actually created a software tool that works a bit like that, although it would need to be polished to look better in terms of design, I suppose.
I am sending you that software, that runs on Windows. You will just need to unzip the folder and double-click the file named "startall". After 20-30 seconds it will be populating your screen with random words. To make each word disappear you just need to move the mouse pointer upon each of those words.

The idea is that you can be using your computer for anything and be learning a language in a quite subliminal way. If a word is blocking something you need to actually see you just need to hover the mousepointer on that word and it will disappear.

The code is free from any virus. I can be sure of that because I build the code my self in C# with Visual Studio.
All the source code is the folder "src". You can inspect the code yourself and built it and adapt as you want.
It may be a bit scary to run a software like this so maybe if you fear it too much you can consider running it in a VirtualBox or something like that. But trust me, it has no virus at all.

It takes 20-30 seconds to load because it will be actually running several instances of the same app to populate the whole screen. It is really fun. I am sure you will love to play around with it a bit.
It may feel a bit scary to run such an app, but trust me it is 100% safe. Otherwise, just run it on a virtual box.

You can get that zipped folder at:
https://cubicpostcode.github.io/assets/ferrarigerm.zip

It will download it. You will probably be alerted of potential danger and will need to choose "keep".

Let me know if you need any help with it.

Kind regards,
Daniel Alexandre

Thanks so much, Daniel! Sincerely appreciate it. Love this feedback and just shared it with the team.

Keep me posted if you have any feedback as you continue using Toucan. Definitely all ears. If you're truly loving Toucan, we'd be so grateful if you added your five-star review here. Every single review helps our team spread awareness of Toucan to even more language learners around the world!

Merci beaucoup and looking forward to keeping in touch :)

Hi Taylor,

I want to improve my French.
I think maybe your chrome extension should be a bit more like Babylon software, making words clickable.
Just an idea.

Kind regards,
Daniel Alexandre

Hey Daniel,

Hope you're having a great day so far. As CEO, I'm excited to personally welcome you to the Toucan flock! :)

I'd love to understand why you decided to download Toucan and how we can make Toucan even better for you. Your feedback has the power to change Toucan for the better and help people learn a new language just as they go about their day.

Also, just out of curiosity, what language are you trying to learn? I'm in the midst of learning Portuguese myself.

Thanks so much for your time and for giving Toucan a try, Daniel!

Obrigada,
Taylor Nieman
